

REMARKS

The Communication of November 26, 2007 indicates the Amendment filed August 3, 2007 was non-compliant because a complete listing of all the claims was not present, and the note accompanying that Communication specifically states "claims 1, 2 are not listed. It appears part of applicant's Remarks and the form for requesting RCE are missing".

In reply to that Communication applicants note the form requesting the RCE and claims 1 and 2 were submitted with the Amendment filed August 3, 2007. For convenience sake a complete copy of that filed Response, and the date-stamped filing request indicating its filing, are submitted herein. In view of that submission applicants submit the previous Response filed August 3, 2007 was complete and included all the claims. An early consideration of the Response filed August 3, 2007 is hereby requested.

Respectfully submitted,

OBLON, SPIVAK, McCLELLAND,
MAIER & NEUSTADT, P.C.

REQUEST FOR CONTINUED EXAMINATION (RCE)

COMMISSIONER FOR PATENTS
ALEXANDRIA, VIRGINIA 22313

SIR:

In response to the Office Action dated May 4, 2007, please amend the above-identified application as follows:

Amendments to the Claims are reflected in the listing of claims which begins on page 2 of this paper.

Remarks begin on page 6 of this paper.

IN THE CLAIMS

Please amend the claims as follows:

Claim 1 (Currently Amended): An information processing system, comprising:

a recording apparatus;

a personal computer configured to access the recording apparatus;

an information processing apparatus comprising:

control means including,

user controlled acquisition means for acquiring, without accessing the personal computer, control information for controlling preset recording of a program by accessing a remote program information providing server through the internet based on a user request to access the remote program information providing server, and

conversion means for converting contents described in said control information acquired by said acquisition means into code information for setting said program preset recording to the recording apparatus, which is remote from the control means; and

transmission means for receiving said code information from said conversion means and for transmitting said code information obtained by said conversion means to said recording apparatus under control of said control means;

the recording apparatus receiving said code information from said transmission means, confirming whether said code information properly sets said program preset recording, and displaying whether said program preset recording is proper or improper.

Claim 2 (Previously Presented): An information processing apparatus according to claim 1, wherein said code information acquired by said acquisition means is G-code, information.
